

Kindergarten going into 1st grade...Summer

Parents please continue to work with your child over the Summer for at least 20 to 30 minutes a day.

Math-practice addition and subtraction facts. Telling time by the hour and half hour, counting money.

Count by 2's, 5's, 10's and by 1's as far as they can.

Reading-Sit and listen to your child read the readers I have sent home. Check out books from the library. Choose some books from the library Read and know all words from reading lists.

Check for comprehension-when reading, ask your child questions about what they are reading. Have him or her retell you the story from beginning, middle and end of story.

This was a great school year!!!!...Thank you for sharing your child with me. Have a blessed and fantastic Summer!!!!
