

## **Science Plants Test Review**

Plants have different parts. Each part has a job.

Roots:

- Roots grow under the ground.
- They absorb water and help hold the plant in place.

Stem

- The stem helps the plant stand up.
- It holds up the leaves and the flower.

Leaves

- Leaves help the plant make food.
- Plants get their food from the sun.

Flower

- The flower can make new seeds.
- Seeds help grow new plants.

## **What Plants Need to Grow**

Plants need:

- Water
- Sunlight

Plants do not need toys, crayons, or shoes.

## **Seeds**

- Seeds grow into plants.

## **Life Cycle of a Plant**

- A plant grows, lives, and dies.  
This is called a life cycle.

Label the parts of the plant.
