

Welcome to Third Grade!
We are excited to meet you in September!

Over the summer you will practice your multiplication facts and read a great book. Below the assignment section is your supply list.

Math Assignment:

Practice and MEMORIZE Times Tables 1-12. It is very important that you have a strong foundation of the times tables in September, you will need to rely on your knowledge throughout the year.

A great way to memorize the facts is to make index cards. For each table 1-12 write out the times tables, one per card. The front will be the equation and the back has the answer.

Example:

On the front of the index card: $1 \times 0 =$

On the back of the index card write the answer: 0

Once you finish each times table, rubber band it together.

Please purchase an index card holder, or a pouch, ziplock etc... to keep all of your index cards in.

You will need to bring your index card box or pouch filled with the flash cards you made to school in September. We will be using the cards for independent study work throughout the year.

Reading Assignment:

Please read the first book in the Magic Tree House Series: **Dinosaurs Before Dark** by Mary Pope Osborne .

We will do various activities in September based on the book, as well as reading other books from this series throughout the year. Please bring the book with you to school in September.

Have a great summer!
-Third Grade Teachers
