

Anastasia Toomey Scholarship

Anastasia Toomey was a math & science teacher at St. Agatha School in the 1970s & 80s. She loved teaching at a Catholic School, especially living in the neighborhood and building personal connections with both the families and students.

A beloved 7th grade teacher, Mrs. Toomey instilled in her students a love of math & science by incorporating hands-on labs into the curriculum and using real-life connections to make math not only easy to understand, but fun to learn.

The goal of the Anastasia Toomey Scholarship Award is to acknowledge students who have an interest and/or strength in the areas of math and science. The hope is that Mrs. Toomey will continue to inspire students for many years to come just as she did when she taught at St. Agatha School many years ago. This scholarship will be for one year, to be applied to tuition at her high school.
