Building Project News

Ardaman & Associates performed subsurface exploration and geotechnical engineering testing onsite in November. The Ardaman crew performed eight Standard Penetration Test (SPT) borings ranging from 15 to 30 feet below the existing ground surface. We are happy to report the existing soils are suitable for supporting the proposed buildings on a conventional shallow foundation system. Please visit the project website, bscbuildingproject.com, or reach out to Mary Rose DiMarco at the parish office (850-222-1321 or mrdirmarco@bscctlh.com) for more information about the building project and to donate to the capital campaign.
