

# FRONTIERS

THE JOHN F. KENNEDY GRADE SCHOOL OF IMMACULATE CONCEPTION PARISH

VOL. 5 No. 1

WASHINGTON, PENNSYLVANIA

MAY, 1966

## MONSIGNOR RICE LEAVES FATHER FORD ARRIVES

On January 18, 1966, the 500 pupils of the John F. Kennedy School assembled in the lobby of the building to bid Monsignor Charles O. Rice a tearful farewell. He was leaving after eight years of magnificent service to our Parish. His new assignment is Holy Rosary Parish in Pittsburgh. The grade school joined with numerous church and civic organizations in paying tribute to the wonderful works of Monsignor in behalf of so many worthy causes which came his way in his care of souls.

Within a few days this same lobby was the scene of a warm welcome to our new Pastor, Father Howard Ford who came to us from St. Peter Church Tarentum, Pa. On this occasion a song composed by S. M. Annunciata and S. M. Concetta and adapted to the melody of "Spoonful of Sugar," rang through the halls as Father Ford became acquainted with his new family of children.

THE JOHN F. KENNEDY SCHOOL which was dedicated by Bishop John J. Wright on January 5, 1966, replaces the 65 year-old structure known as Immaculate Conception Grade School, formerly located on North Franklin Street. The new building was named in honor of President Kennedy because it was in the planning stage at the time of his tragic death. Monsignor Rice said on this occasion, "We named the structure in his honor because of our pride in his life and our sorrow at his death."

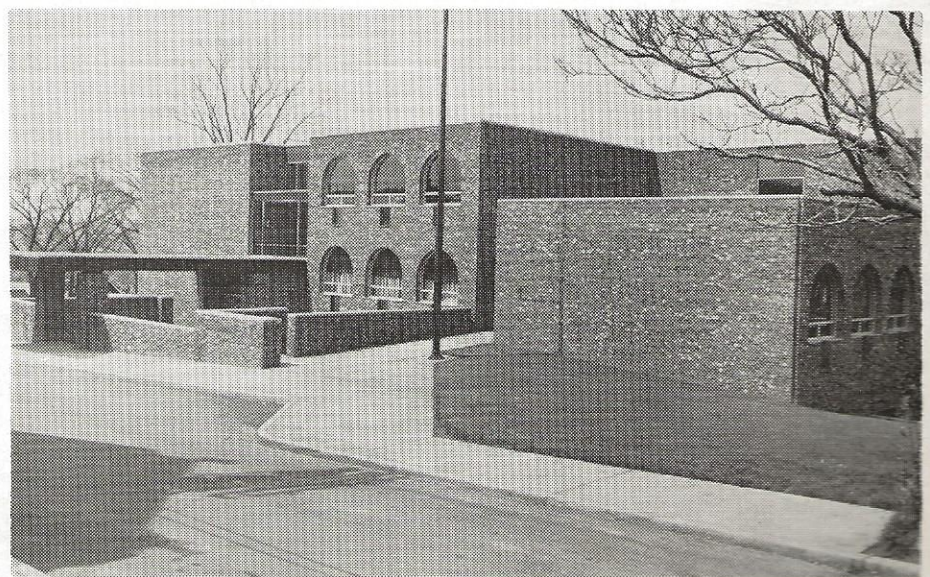

The new school building consists of three levels comprising 15 classrooms, a library including an audio-visual center, science laboratory with display and storage rooms, two materials centers for small group instruction, a bookstore, faculty lounge, staff room, health room, administration office with adjoining workroom, a lobby, and an activities room.

Each classroom is equipped with built-in screen projection area across

the upper front of the room, and provision has been made for closed circuit television in the near future. On each of the three levels the classrooms in the west wing have movable walls to accommodate combined groups on occasion. There is also an electric service elevator on each floor.

The revised curriculum will utilize the latest in instructional technology. Nearly all classrooms now have overhead projectors, film projectors, and materials for team teaching. A non-graded program in mathematics and language arts is the goal of the curriculum planners for 1966-67.

The architects for the John F. Kennedy School were Deeter & Ritchey of Pittsburgh; the contractor was McAnallen Brothers, Incorporated of Washington. Monsignor Charles Owen Rice, the pastor during the construction and planning months, and Sister M. Colman, principal, were active in the planning and recommendations for the new building.

JOHN F. KENNEDY SCHOOL

This school is dedicated to the memory of John Fitzgerald Kennedy, thirty-fifth president of the United States, in the hope that the admixture of religion and patriotism, which made him great, will by God's grace enrich all who seek knowledge and faith within its walls. (Words of Dedication Plaque)

### THE JOHN F. KENNEDY LIBRARY

Pictured here is a typical after-school group engaged in research. These pupils are middle grades who find the library very helpful in preparing their assignments, especially in the area of the Social Studies. Two of the students are examining books from the special section called THE KENNEDY COLLECTION.

The library is open for the use of classes with their teachers throughout the day, though there are specific hours assigned to each room. The library is open for circulation of books from 3:00 until 4:30 each day. Mrs. Joseph Barbarossa assists Sister M. Colman in the administration of the library. Several eighth grade girls are being trained as library-aides for after-school service.

The library proper is 36 feet by 34 feet in floor space with a communications center and librarians' workroom included. In the communications center is kept all the audio visual equipment and teachers' materials for instruction. The library houses approximately 2000 books in this beginning stage. The expected increase for next year is about 50%.

Several friends of the school have donated furnishings or books in the past months. At the time of the dedication of the school the benefactors' list included:

Charging Desk—In Memory of Ralph & Carolyn Cornetti by the Family

Dictionary Stand—In Memory of Janet Lynn Marra by her Parents

Bronze Bust Of President Kennedy—John Hayes

Credenza—Christian Mothers of Immaculate Conception Parish

Books for the Kennedy Collection were donated by:

Miss Linda Aitken, School Nurse—1 book

Eighth Grade Class of 1965—1 book

In Memory of Joseph Mastrangelo by Mrs Florence Sorice & Family—1 book

In Memory of Mrs. Eva M. Warco by Mr. & Mrs. Stanley A. Warco and Children—4 books

In Memory of Laura Pepe Resciniti by the Grandchildren—shelf of books

In the past week several donations have been received for plates to be placed in the front of books In Loving Memory of Susan M. Kittridge, our first grader who died on May 10th, 1966. These include requests from Mr. and Mrs. Gandy Interval, (5 books), Mr. and Mrs. O. L. Colombo, Eighth Grade Class of 1966, (3 books) and Children of the Grade School, (3 books).

Our LIBRARY will receive many new books in September because of the Elementary and Secondary Education Act approved by the Government recently. Our plan this year is to enrich the story book section for the middle grades.

Next semester the library will also install three or four carrels for private study or research by upper grade students. One of these will be equipped for viewing of slides or filmstrips; another will have recorder and ear-phone sets for private listening.

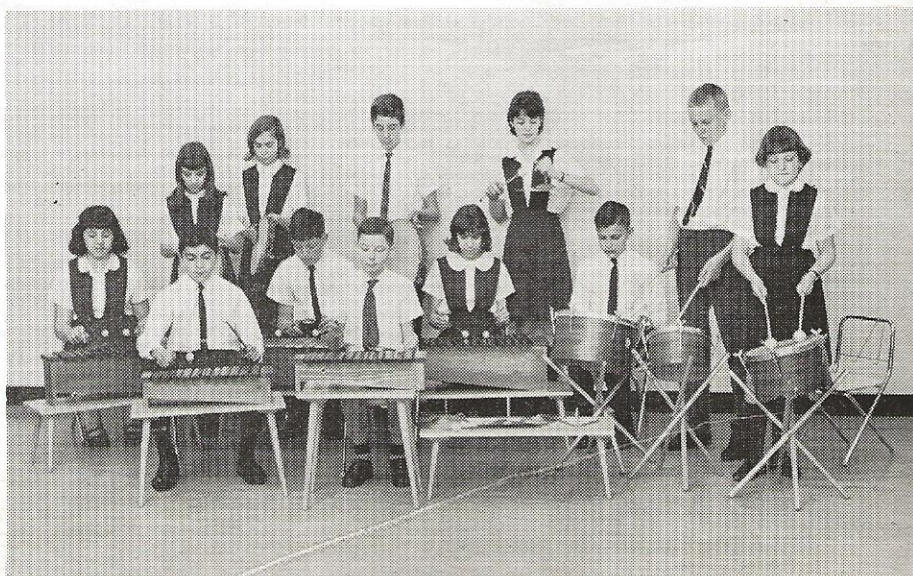

### MUSIC

Some time ago our school purchased many musical instruments for group and individual instruction for pupils of all grades, but chiefly for the primary department.

Pictured here are some of the instruments of percussion, namely xylophones, glockenspeils, timpani, cymbals, drums, triangles, and tambourines.

Plans are under way to begin this course in September in our school. The course originated in 1948 in Germany by Carl Orff who has developed his own School of Music for children in Munich, Germany.

Mt. Mercy College and Carnegie Tech are offering a special ten day course in July for music instructors.

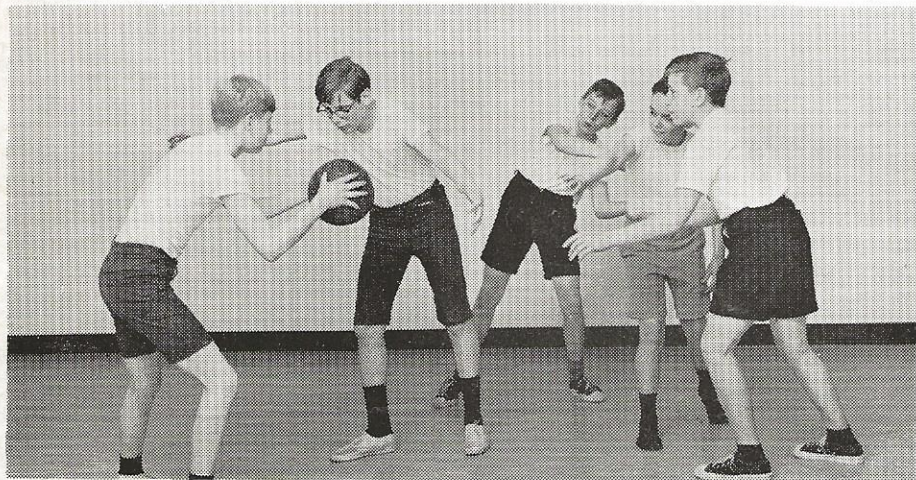

Pictured here are students of the seventh and eighth grades who attend weekly classes conducted by Mr. Ray Natili of the High School faculty. The classes are held in the high school gymnasium.

Pupils of grades 1-6 participate in physical training lessons in the grade school Activities Room, or the playlot. Each group is assisted by one of the teacher-aides.

The sixth graders of Rooms 304 and 305 will hold an outdoor demonstration of their skill in the school playlot on Wednesday, May 25th at 12:30 p.m.

## PHYSICAL FITNESS

On Wednesday May 4, 1966 approximately 50 students from the John F. Kennedy School participated in the Physical Fitness Pentathlon co-sponsored by the Amateur Athletic Union of the United States and the Quaker Oats Company. This event was held at the A & P parking lot on Jefferson Avenue. Those who took active part in the program were presented Certificates of Achievement stating that they have contributed to the physical well being of the youth of our nation. Each participant was also given a prize for his efforts in competing with other children in his own age group.

## CANCELLED STAMPS

The annual drive for cancelled stamps was held this year, under the supervision of Sister M. Cornelia. Students of John F. Kennedy School, and their friends aided in the collection of these cancelled stamps. As in the past, the student effort was most gratifying. The five bags of stamps, totaling 200 pounds, were mailed on April 28th to the Cantian Stamp Bureau in St. Louis, Missouri. Our thanks to all of those who helped in the collection of these stamps, and to Timothy Cook of seventh grade who has sorted thousands of stamps into the various categories. Our goal is another trophy for aiding the missions.

## RECEIVES HONORS

Finalist in the school spelling competition, Catherine Noroski represented us in the Annual Spelling Bee conducted in the Washington High School Auditorium. Catherine was also selected to receive the D. A. R. History Award which was presented by the Washington Chapter.

## PART IN ABC's

Each grade in our school participated this Spring in the annual A B C's of Industry. This contest is sponsored by Industry in the interests of improving handwriting and essay skills. Our students have taken awards for the past 8 years and hope to be among the winners to be published in October.

## SPEECH:

In order to provide for every need that a child might have in his school day, the services of a speech therapist have been made available for the past few years. Last year and this year Mr. William Kusmirak has been our very successful therapist. He instructs the children who need speech corrective drills for one period a week. This service is given to pupils of all grades as they are recommended by their teachers or parents.

## CAMP FATIMA

Many students of John F. Kennedy School have registered at Camp Fatima, a summer camp for boys and girls of the Pittsburgh Catholic Diocese. This camp is operated by the Catholic Youth Organization, and is located in Connoquenessing, Pennsylvania. Numerous events are scheduled for girls and boys from the ages of 8 to 14. A religious program, consisting of Mass and the Rosary, is also included.

FIGURE SKATING TROPHY was awarded to Michele Vorum, Grade 8, on May 22nd for exhibiting the greatest progress in her class. The trophy was presented at the Redwood Motor Lodge, Pittsburgh.

ACROBATICS STAR, Karen Tracanna, grade 5, preformed in the Variety Club Telethon on May 22nd for the benefit of Camp O'Connell. Karen will be participating in a contest in Atlantic City in June.

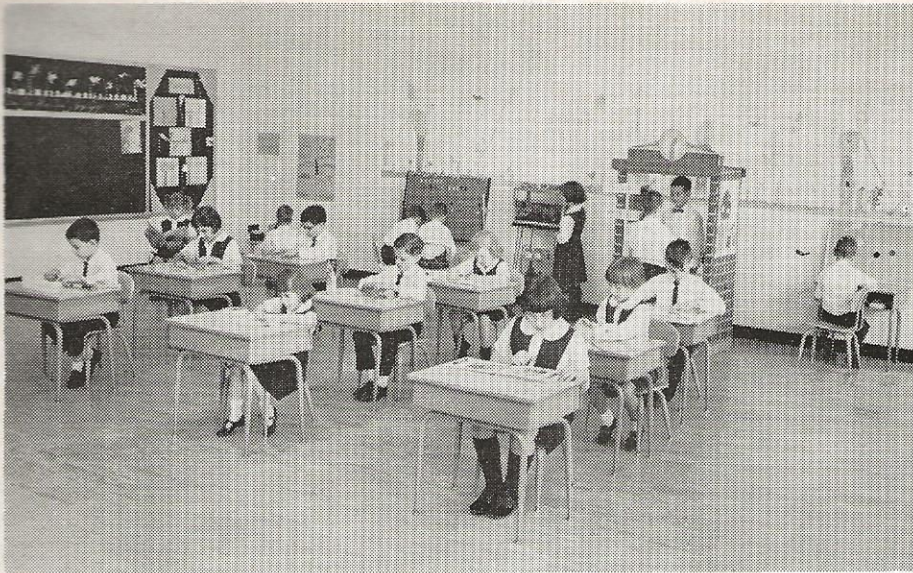

## IN MEMORIAM

SUSAN KITTRIDGE

On Tuesday, May 10th, 1966, the soul of our little first grader, Susie Kittridge, entered into heaven for all eternity. We will miss seeing her around the school, especially at change of class time in the primary department when Susie rang the bell. She was a very superior pupil in all her lessons in spite of the fact that she started school a year early. Susie was six on March 27th. Susan received God in First Holy Communion on January 16th.

At the Mass of the Angels, A Funeral Mass for Little Children, Father Howard Ford, our New Pastor, consoled the Kittridge family, their friends, relatives, and the 500 pupils of the grade school with words of deep sympathy. Father explained why Susan's death was really just a departure from us, and that God had called her soul to be with him forever, saying that one of the greatest joys possible is the positive salvation of a soul. Her soul is now with God in heaven: her family and friends here on earth are lonesome for her presence, but, in God's own words, "Your Sorrow Will Be Turned To Joy".

### WORK & PLAY . . .

Some work and some play  
Makes first graders happy all day.

A certain amount of free time is given each day to an Activities Period in which the little children choose from a variety of educational experiences such as storekeeping, puzzle matching, checking out story books from their own library, and very important to the "caretaker of the day"—the feeding of several pets. The most popular choices each day are the management of the lending of library books and the observing and care of the fish, the hamster, turtles, and rabbits.

### SING . . .

A practice session such as the one pictured here is just a small part of the excellent music program offered in the Primary Department by Sister M. Concetta. The children are taught rhythmic activities to accompany some of their selections as well as simple dance forms for body development.

Over 500 persons gathered in the Church Hall to see and hear the entire group of nearly 200 children perform on April 24th in their special Spring Festival of Song and Dance.

FRONTIERS is a grade school quarterly newspaper produced by students of the John F. Kennedy School of Washington, Pennsylvania. This publication was known as THE JUNIOR IMMACULATAN for the past five years.

### WHAT NEXT?

First graders may learn the fundamentals of the alphabet, the study of phonics, through the use of typewriters next September. This will be an experiment with about twenty youngsters who may show an aptitude for this particular skill. Comparison will be made with those who follow the familiar procedure of using separate cut out letters printed on small squares of cardboard. The evaluation will measure speed and permanence in the learning of letters of the alphabet. One of the objects of this experiment is to conserve the time usually lost in searching out a letter from hundreds in a box. The letter on the keyboard will always be in the same place. Youngsters will be taught proper finger positions on the keyboard.

### ABACUS TO ALGEBRA

This is one of many typical classrooms scenes during lessons in modern mathematics throughout the school. Here Sister M. Hilary is explaining to one of her fourth graders the fundamentals of fractional measurement on a number line.

The "new" math program has been in progress here for several years from the abacus of first grade to algebra in the eighth. Recently students from the eighth grade have been admitted to sophomore high school math classes in their freshman year.

### MANY FIRSTS

The transportation of approximately 25% of our pupils by public school bus began in September. Over 100 children are picked up outside the city limits and taken to the Trinity High School campus where they board Immaculate Conception Parish buses which bring them to the door of John F. Kennedy School. Parents, faculty, and children are very grateful for this arrangement. All are proud to note that there has been a successful first year of free transportation for those students who live beyond walking distance.

ANOTHER FIRST in the history of the school is the request of the parents for the adoption of uniforms for the girls. The boys have always worn clothing which is more or less uniform and in keeping with good grooming. The girls are now wearing forest green open jumpers and white blouses. Accessories are optional. The girls are pleased with the numerous conveniences of this arrangement. Those who participated in the Forty Hours Procession in late September were the first to wear the new uniforms for such an occasion.

### A NONGRADED SCHOOL

There are many definitions of "nongraded" schools. In general, the plan in operation at John F. Kennedy School is that of nongraded subjects within the three departments usually referred to as primary, intermediate, and junior high. The subgroups of the departments are called levels. There can be as many levels as the room capacity, number of teachers, etc. can accommodate. For example, in the primary department this year there are five report rooms, and four additional rooms where smaller groups may be instructed simultaneously.

The subjects which will be nongraded are Mathematics and the broad area known as the Language Arts which include reading, spelling, phonics, English and handwriting.

Pupils are placed according to their achievement level and they have the opportunity to advance or not according to their ability. The goal of nongradedness is not to accelerate promotion from grade to grade, but to progress from one level to another according to one's own rate of learning. This type of program eliminates the "repeating a grade" for those who learn more slowly. The pupil does not usually repeat the entire grade but the subject in which he has failed to maintain normal standards.

The student's age and other social aspects of the grouping situations are carefully considered by the instructors in each group.

### OPENING DATE NEXT YEAR

Watch the local papers and your Church Bulletin this summer for full details on the schedule of buses and the opening date for pupils of the John F. Kennedy School this Fall.

### END OF YEAR ROOM REPORTS

- 101—looking forward to a homeroom on the second floor next year.
- 102—will miss their movable walls when class splits into new groups in September.
- 103—report that May 8th, their First Holy Communion Day, was the most important day of their lives.
- 104—hope that all their live science lessons, fish, hamster, turtles, etc. will be promoted with them to next room or group.
- 105—can't wait till the new instrumental music program gets started soon.
- 202—will miss their SRA reading sessions if they advance to next level.
- 203—promise to be faithful to those 15 minutes of physical fitness all summer long.
- 204—hope that they will continue to be the best library class in the future as they been for many months.
- 205—expect to win all multiplication table contests for the rest of their lives.
- 302—ICHS for nearly the entire class. Will miss JFK School, but report their happiness in the honor of being first graduating class.
- 303—Industrial Arts classes close with displays and style shows. Looking forward to being the 'top' class of the school next semester.
- 304—Proud of their repertoire in vocal music. Hope to continue leadership in the Mission Stamp Drive.
- 305—Eagerly awaiting the challenge of advanced mathematics and double time in the science lab.

### FIRST HOLY COMMUNION CLASS

On Sunday, May 8th, at the 9:00 o'clock Mass offered by Father Ford, 43 children who have been enrolled for three years in the Saturday Class of Religious Instruction along with 62 second graders of the John F. Kennedy School received their First Holy Communion in an impressive liturgical ceremony. The entire group was photographed afterwards in the Church Hall.

## SCIENCE LABORATORY FACILITIES

The science laboratory in our new building has served its students well in this, its first school term. Visitors may tour on the third floor and stop in amazement at the activities taking place in the lab. At times, small groups of children may be working there alone, testing, studying, taking notes. Usually an entire class uses the lab for some special instruction or demonstration.

Little children are especially fascinated with the laboratory. A group of 40 first graders was given the grand tour one afternoon. They experimented wonderingly with a magnet and iron filings, learned how to peer into a microscope, witnessed the use of a bunsen burner. They fed and handled the guinea pigs, hamsters and chicks and they shrieked at the jars of preserved frogs, crayfish and worms.

Everyone who enters the lab is immediately attracted by the professional collection of rocks and minerals. Large valuable specimens are displayed in the specially built glass-topped cases. A short written description or history of each specimen is there. A little rock tumbler is usually operating, polishing small chips of agate, obsidian or jasper. This room is the headquarters of the school Geology Club, a newly formed science organization designed to stimulate interest in earth science. Members have frequent meetings, field trips and other activities involving Geology. 160 active members hold club cards and contribute information and activities from time to time.

Recently, the seventh grade class donned lab coats, overshirts or aprons, and performed dissections on the animal specimens preserved in formaldehyde. They sketched drawings of the vital organs and included appropriate labels. Students in other grades marveled as each seventh grader displayed his work, and they received commendations from all the teachers.

### A NOTE OF THANKS . . .

The school year will come to a close on June 9th with a well-deserved round of THANKS to:

Mrs. Edith Linden and her Cafeteria workers for 180 days of good and tasty lunches;

to Mr. Joseph Propersi and his helpers for their care and maintenance of our new school building.

THANKS FROM ALL.

(front row) Sister M. Hilary, Miss Nancy Price, Sister Mary Agnes, Sister M. Cornelia, Miss Loretta Aitken, Sister M. John Baptist.

(second row) Miss Teresa Findlay, Sister M. Concetta, Miss Dolores Cobucci, Sister M. Colman, Principal, Mr. Casey Resciniti, Sister M. Bernardo, Mrs. John Bigler, (insert) Sister M. John Vianney.

## V. A. P. INSTITUTED AT JOHN F.

A year ago Monsignor John B. McDowell, superintendent of schools for the Diocese of Pittsburgh, authorized and encouraged the establishing of VAP, Volunteer Aid Program, in the schools. The purpose of this organization is to aid the school faculty in routine duties and to assist teachers in areas such as physical training, library services, clerical help, art and music appreciation lessons, care of audio-visual equipment and resources, and guided drills in remedial or enrichment aspects of the language arts and mathematics.

Several of the aides who are now giving many hours a week are specializing in specific subject areas, such as phonics and art. They are greatly aided by the teacher-training courses currently offered on television station WQED.

The program is under the direction of Sister M. Colman, principal. Mrs. Joseph Barbarossa, the assistant librarian is the coordinator for VAP.

The following are assisting the school at the present time. The faculty is deeply grateful for this voluntary and very efficient aid.

Mrs. Leonard Bogdan  
Mrs. Bruno Calabro  
Mrs. William Kittridge  
Mrs. William Loar  
Mrs. John McGinnis  
Mrs. Gordon Noroski

Mrs. Joseph Rodjom  
Mrs. Vincent Sonson  
Mrs. Lawrence Zanolli  
Mrs. Joseph Zaucha

## ALASKA BOUND!

The University of Alaska, situated outside the city of Fairbanks, will be the scene of summer study in Geography for Sister M. Colman, principal. Sister has been awarded a grant from the National Science Foundation for an eight week course in geology. Sister is a specialist in geography and related subjects and has spent several weekends this past semester working with the Eastern Educational Network in Boston on a television course in social studies.

Also attending the same University this summer will be Miss Dolores Cobucci, eighth grade teacher, who has received a grant from the same Foundation for study in Mathematics and Science. Two other Sisters of Mercy from this area are also recipients of similar grants for summer study.

Pupils who will be entering the first grade in September and have not been tested for group placement will be notified of the date for this test prior to the last week of August. Watch the Church Bulletin for further information.

## EIGHTH GRADE GRADUATES

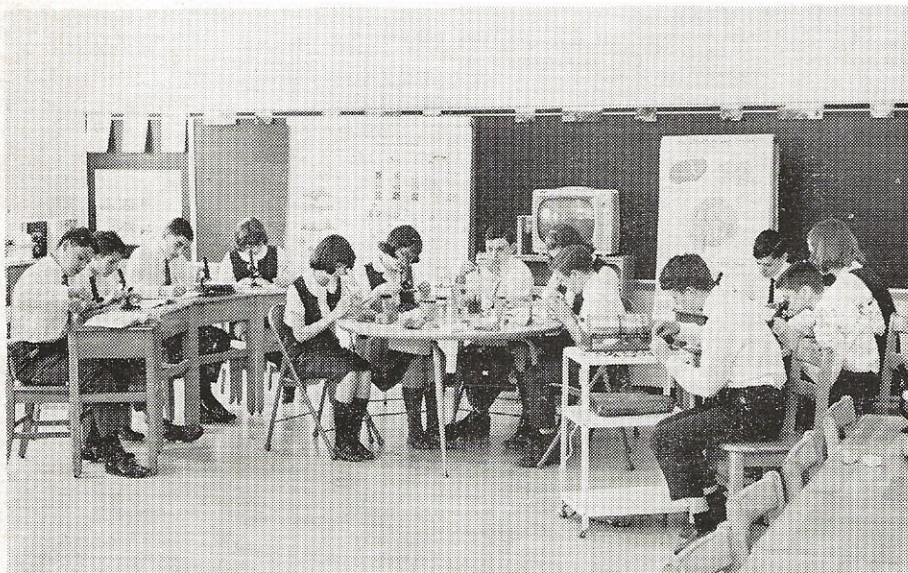

The Eighth Grade Class of 1966 consists of 26 girls and 27 boys. The class officers are: President, Mark Harshman; Vice-president, Jerome Zaucha; Secretary-treasurer, Deborah Badiali.

The graduating class has participated in many activities this school year under the able leadership of Miss Dolores Cobucci, their homeroom teacher and director of curriculum planning for the upper level department. One of these activities was the preparation and packing of 58 boxes of home needs for an economically deprived section of a nearby city. The letters of thanks written by the children who received the gifts was most heartwarming and gratifying to the students. The Science Department also took part in the Annual Buhl Planetarium School Science Fair. A trip to the Planetarium climaxed the efforts of the pupils. Three of the entries were declared outstanding in achievement.

The class of 1966 continued the Safety Patrol Program for which they were trained last Spring. Several of the Safety Patrols will receive certificates of recognition at the Class Day Exercises on May 19th.

The Class Day Program will begin with Holy Mass on Thursday, May 19th with parents of the eighth graders and the members of the seventh grade class as guests. Father Howard Ford, our pastor, will address the group at the Communion Breakfast in the Cafeteria after the Mass. Class Day conclude with a special program in the Church Hall on Friday, the 20th, at 12:30 p.m. The program is entitled "A Journey into the Future."

Certificates will be awarded to the following pupils at the breakfast on Class Day:

## REMINISCENCES

- ....the creaky climb to our classroom in the old building high up in the auditorium area
- ....the winding and very lofty fire escapes
- ....the pigeons on the window sills surviving whole lessons in math
- ....the rattling beads warning of Sister's approach through nearby Library
- ....the hats and basketballs lost behind a neighbor's fence
- ....moving day to the new building
- ....the first snowfall we saw through our large new windows
- ....The Geology Club and our field trips
- ....our first attempts in the science laboratory
- ....preparing our autobiographies for Class Day and autographing
- ....helping Mr. Bogdan's Santa as he visited the rooms
- ....our joy at seeing Miss Loretta Aitken every day
- ....the last Mass with Monsignor Rice
- ....our own loving, laughing top sergeant and homeroom teacher, Miss Dolores Cobucci

## SCIENCE ACHIEVEMENT:

Mark Harshman  
Peter Valeta  
Janet Wicks  
Daniel Florian  
Jerome Zaucha

## MATHEMATICS ACHIEVEMENT:

Mark Harshman  
Kathryn Wozniak  
Gail Staskiewicz  
Jerome Zaucha  
Peter Valeta

## DISTINGUISHED SERVICE

Jerome Zaucha  
Mark Harshman  
Rose Bombara

## SAFETY PATROL FAITHFUL SERVICE:

James Connolly  
Timothy Gilmore  
William Dinello  
Kathryn Wozniak  
Bernadette McKivitz

## AD ALTARE DEI (Boy Scouts)

Albert Cario  
William Dinello  
Mark Paletta

## AMERICAN LEGION MEDAL

Marinell Staats  
Mark Harshman

## SERRA CLUB (Altar Service)

William Dinello

## GRADUATION SONG

adapted by R. Barry Sidell

On the day of our graduation  
Days gone by quickly pass in review  
We'll remember our loyal classmates  
And cherish the friendships we knew

Tho we travel the wide world over  
In our hearts we will always recall  
That the days spent at J. F. K. School  
Were the happiest days of all.

## CONGRATULATIONS!

To Miss Dolores A. Cobucci, eighth grade teacher for the past eight years, who has been awarded a grant to attend an Academic Year Institute for teachers of Earth Science at the University of Houston, Texas. This program is designed to complete the requirements for a Master's Degree in Earth Science.
