

Junior High Math Corrections Policy

The goal of homework is for you to practice the skills we are learning in class, and to learn from any mistakes. Completing homework fully and to the best of your ability is one of the best ways to better understand what we are learning. Making corrections on any mistakes allows you to learn from those mistakes, and to better understand the math skills we are working on in class. Making corrections is also one of the main ways to earn a higher grade and improve your overall math grade.

Students who earn less than 85% on a homework assignment may complete corrections on that assignment. Students will be able to earn up to 85% (a B) by completing corrections.

Corrections must:

- Be completed on a new piece of notebook or graph paper
- Have a heading that clearly states which assignment is being corrected
- Include **all** problems from that assignment, with all necessary work shown
- Be turned in by the Monday following the assignment being graded in class (If we grade the assignment on a Wednesday, the corrections need to be turned in by the next Monday. If we do not have school on that Monday, the corrections need to be turned in by the first day of school that week. You can always turn in your corrections before Monday, but I will not accept them after that.)
