

# PM Pediatrics COVID Testing & Telemedicine for Schools

June 9, 2020

# PM Pediatrics – The Leading National Pediatric Urgent Care

**PM Pediatrics was founded on the belief that there is a better way to deliver acute care to children and young adults**

Our mission is to become the obvious choice for parents whose children need immediate care, by emphasizing care, comfort, convenience, and comprehensiveness, whether in person or virtually.

- 55 locations across 11 states
- Pediatric focus – child friendly environments, tailored patient experience and staffed by pediatric experts
- Specialized staff – board-certified pediatric emergency physicians and pediatricians, pediatric nurse practitioners and PAs
- Integrated office and telemedicine offerings – open 365 days
- Quality care – fewer transfer rates to hospitals, lab and x-ray on site, partners with primary care physicians

# COVID-19 Testing

We offer two (2) kinds of tests for COVID-19 for children and adults. While no test is 100% accurate, we are using national reputable laboratories that do their own internal validation to ensure reliable testing practices.

## PCR (nasal)

This test will tell you if you currently have COVID-19

Appropriate test for those with COVID-19 symptoms

A swab is inserted into the nostril to collect a sample

Results obtained within 2 days

## Serum Antibody (blood)

This test will determine if your body has built up antibodies to the virus that causes COVID-19

Appropriate for those who think they had COVID-19 and are no longer showing symptoms or exposure to COVID-19 without any symptoms

This test requires a blood sample drawn from a vein

Results obtained within 2 days

# PM Pediatrics Anywhere – Telemedicine App

## Pediatric Experts Available for Virtual Visits

Telemedicine can provide the **same high level of care from the comfort of your home**, reducing the amount of time missed from work or school.

Our experts care for babies, children and young adults through age 26 to diagnose and treat common urgent conditions. We also evaluate adults over age 26 for COVID-19 testing referral.

Most **common pediatric illnesses can be diagnosed and treated effectively** including respiratory infections, pink eye/conjunctivitis, skin rashes, fevers and more.

## PM Pediatrics & Schools

Let's get safely back to school this fall.

### Safe & Convenient COVID-19 Testing

We offer dedicated days and hours for in-office testing of students and faculty.

Ability to customize, such as setting up on-site testing clinic for school system.

### COVID-19 Consultation to Parents & Administration

Expert consultation including webinars to help parents and faculty navigate these challenging times and feel more confident with returning to school.

### Virtual Access to Pediatric Specialists

Support school health staff by connecting them to our pediatric experts experienced in treating a wide array of illnesses, including COVID-19.

Offer state-of-the-art technology and training to school nurses to check ears, throat, heart, lungs and skin.
