

3rd Grade Summer Reading Book Project

Lucy Lopez: Coding Star (After-School Superstars)

Welcome Future 3rd Graders!

For Summer Reading this year you will be reading Lucy Lopez: Coding Star. This awesome book follows the life of Lucy Lopez and her sister Elena while they create their own After-School club that uses coding to design different badges to earn while participating in the club. After reading the book, you will complete the following project:

- Character Collage: Create a collage featuring the main character, Lucy Lopez, using cut-out images or drawings. Include key elements that represent her coding skills and adventurous personality!
- This collage could be made on an 11X14 poster board or a heavy duty piece of construction paper.
- Please make sure your collage is colorful and creative!

Remember to have fun making your project and let your creativity shine. This project should help you explore and express your understanding and enjoyment of Lucy Lopez: Coding Star. Happy reading and coding!

Happy Summer!

Xoxo- Ms. McAleer
