

THIRD GRADE ANIMAL PROJECT RESEARCH LINKS 2025-2026

The page is framed by a decorative border of colorful fish. The border consists of a top row of 18 fish, a bottom row of 18 fish, and two vertical columns of 12 fish each on the left and right sides. All fish are facing right and have orange and black stripes on their bodies with blue fins.

The following guide contains the names and assigned animals for each child in the third grade class. It is arranged alphabetically by last name. Next to each student's name is the name of the animal they have chosen for their project.

Underneath each name is a short listing of website links that have been selected to guide them in their research. Each child should find and print at least three websites, bringing the copies to school to leave in their animal project folders (which have been provided).

Each week, they will work with their information to create a Google Slides presentation about their animal and write a short report. They are permitted to use the pictures on the printed pages to decorate their project folders.

If you are unable to print any of the websites, please let Mrs. Stadelman or Mrs. Pedersen know and they will assist your child in printing information.

Mrs. Stadelman- estadelman8656@olhamptons.org

Mrs. Pedersen- mpedersen8656@olhamptons.org

We hope this guide will be helpful as you work on your project.

Happy searching!
