

# WE'RE BUILDING A NEW CHURCH!

1970s

2016

COMING IN 2020!

## DID YOU KNOW ... ?

... that the large pond being constructed along Highway 54 is a Stormwater Control Management (SCM) facility and will be classified as a "wetland." The area will be surrounded with beautiful native wetland plants that will enhance the beauty of our campus and protect our environment. A pre-construction meeting to discuss the wetland pond was held on January 22.

## OTHER FACTS:

- Tree trunks were cut to length and taken to a sawmill for use as lumber and other wood products.
- Asphalt and concrete is being recycled to avoid the cost and waste of sending to a landfill.
- Soil removed during grading will be piled behind our current building for re-use.

## PROGRESS

Site preparation—  
ONGOING

Building permit—  
ISSUED

Foundation preparation—  
BEGUN

## WHY ARE WE DOING THIS NOW?

Holy Infant Catholic Church was dedicated as a parish in October 1970. Over time, the membership has outgrown our existing space. We are building a new church to support the increased needs for worship, fellowship and educational spaces.

**Your patience is greatly appreciated  
during this exciting time for our parish.**
