DID YOU KNOW

Underage drinking can cause brain damage

Underage drinking can certainly get your teen into a lot of trouble — loss of driving privileges, fines, and even criminal charges. But underage drinking can also cause significant brain damage. An adolescent's brain does not fully develop until the age of 25. Early alcohol use can affect that development, causing memory problems and potential dependency on alcohol later in life. For more information to share with your teenagers, read the VIRTUS® article, "Underage drinking isn't just illegal, it damages the brain" at

lacatholics.org/did-you-know/

SABIA USTED

El consumo de alcohol por menores puede causar daño cerebral

El consumo de alcohol por menores de edad sin duda puede causar muchos problemas a su hijo adolescente: pérdida de los privilegios de conducir, multas e incluso cargos penales. Pero el consumo de alcohol por menores de edad también puede causar un daño cerebral significativo. El cerebro de un adolescente no se desarrolla por completo hasta los 25 años. El consumo temprano de alcohol puede afectar ese desarrollo, causando problemas de memoria y unapósible dependencia del alcohol más adelante en la vida. Para obtener más información para compartir con sus hijos adolescentes, lea el artículo de VIRTUS® en inglés, "Underage drinking isn't just illegal, it damages the brain" (El consumo de alcohol por menores de edad no solo es ilegal, sino que también daña el cerebro) en
