**If any of your children were baptized outside of this parish, and you have not already supplied us with a copy of each child's baptismal record, you will need to supply a copy for our files.**

ParishSoft is the software program our parish utilizes to manage our records. It has proven to be beneficial to me in many areas of my work. A weakness that I have found is that in making sure that we have parental information in our database to record when a child receives a sacrament it doesn't allow us to record marital status and I am always concerned that I might offend someone when addressing mailings. Could you take a moment to check off below how you would like me to address any mailings that I send out. Thanks!
