

# Lifespan

“Before I formed you in the womb, I knew you, and before you were born, I consecrated you.” Jeremiah 1:5

## 2022 First Quarter

### Worldwide News... [Source: SPUC]

**Australia**—People hoping to receive an organ transplant in Queensland, Australia may be denied the potentially life-saving procedure if they refuse to get vaccinated for COVID-19, reports 7News in Australia. Queensland Health confirmed that patients have “a minimum requirement of two doses of an approved COVID-19 vaccine prior to receiving a kidney, lung or heart transplant.” This unbelievable decision is a clear example of the evil madness that has resulted from fear of a virus. While claiming the vaccines are to “save lives” these despots are quite comfortable in signing the death warrant of people who simply wish to refuse a medical therapy for something that poses a far lesser threat to them than the need for organ transplantation.

**Canada**—The bill banning conversion therapy in Canada received royal assent on Wednesday, making it into law. Bill C-4 makes providing, promoting or advertising conversion therapy a criminal offense. The bill defines conversion therapy as the “practice, treatment or service designed to change a person’s sexual orientation to heterosexual, or to change a person’s gender identity to cisgender.”

**Quebec**—A recent inquiry into Covid deaths in nursing homes in the Province of Quebec is revealing that many documented “Covid” deaths were actually elders who died by euthanasia, abuse or neglect. According to Dr. Vinh-Kim Nguyen an emergency room physician at Jewish General Hospital, the patients he saw early in the pandemic had recovered well after a day or two of oxygen infusions. When he was sent to work in the nursing care facility, Nguyen maintained that “the only measures available were often end-of-life respiratory distress protocols, or strong cocktails of drugs used to reduce suffering...protocols that lead to death. [...] It was in fact euthanasia.” The CHSLDs (long-term care and housing centers) were not able to provide acute care, so patients in distress were transferred to the hospital, a move often “extremely difficult” for those with cognitive disorders. He also cited “multiple bedded rooms,” “shared bathrooms,” “inadequate ventilation,” and “poor air conditioning” as killers during the pandemic.” But the abandonment of the elderly is what scandalized him the most. From February 25 to July 11, 2020, Quebecers aged 70 and over accounted for 92% of deaths from COVID-19, according to data from the National Institute of Public Health of Quebec.

**Ireland**—The once Catholic nation of Ireland that has embraced abortion on demand is now considering legislation that would restrict pro-lifers from gathering in front of abortion

clinics to pray and educate. The legislation, which has passed second stage in the upper House of the Irish government, now moves to committee stage so that it can be discussed further. If passed, the Bill would also mean that no gatherings can take place outside or within 100 meters of abortion facilities. In a move to create “safe access zones.”

**Nicaragua**—Lisa Miller, an ex-lesbian woman who fled the United States to protect her daughter from her allegedly abusive former partner, is facing prosecution by the Biden Justice Department after being brought back to the U.S. more than a decade later. Miller, who has renounced homosexuality and converted to Evangelical Christianity, fled to Nicaragua in 2009 to avoid losing custody of her daughter, Isabella, who was seven years old at the time. The Millers were pursued by federal authorities for years during the Obama administration, though they remained in hiding until January, when they voluntarily surrendered themselves at the U.S. Embassy in Nicaragua.

**Switzerland**—A new assisted suicide machine may be implemented in Switzerland within the coming year. The Sarco suicide pod is a “coffin-like capsule” that allows an individual to press a button to activate their own death-by-hypoxia. “This so-called portable suicide pod is nothing more than a portable gas chamber,” says Population Research Institute President Steven Mosher. “Imagine having a ‘coffin that kills’ in your living room, asking you on a daily basis, ‘Are you ready to die today?’ The devilish ingenuity of those who want to kill off humanity knows no bounds.”

**United Kingdom**—Like so many women, Helena was encouraged to abort her unborn child after learning that her baby would be born with Spina Bifida, a condition that occurs when a baby’s spine and spinal cord does not develop properly in the womb, causing a gap in the spine. Spina bifida affects about 1,500–2,000 babies born in the U.S. each year and around 700 in the UK annually. Often part of the spinal cord is exposed and is prevented from developing properly. It can lead to paralysis, bowel, bladder, and kidney problems. But if surgeons can operate at between 22 and 26 weeks of pregnancy, instead of after birth, improves the outcome for the baby. Bethan made the choice for life and opted for the surgery. At 23 weeks gestation, baby Mila had the surgery in a Belgium hospital. She was born 3 months later with the ability to move her fingers and toes. Mila is now walking without intervention!

### National News... [Source: SPUC]

**Illinois**—In a pattern of behavior repeated in hospitals throughout the nation, an Illinois hospital refused to administer Ivermectin to a critically ill Covid patient despite a court order to do so. Edward Hospital in Naperville, Illinois, refused to allow the patient’s physician into the hospital to administer Ivermectin even though Sun Ng’s daughter, Dr. Man Kwan Ng, had secured a court order on November 1st requiring the hospital to allow the course of treatment, according to a press release. After three attempts, the daughter was allowed into the hospital to administer the drug. Within days of receiving the treatment, Ng made a full recovery and was discharged on Thanksgiving weekend after spending 22 days on a ventilator prior to treatment with the life-saving drug.

**Massachusetts**—The City of Boston now allows its employees to take up to 12 weeks of leave with pay when they abort their unborn babies. The *New Boston Post* reports the city council passed the amendment to its parental leave policy on September 15. The vote was unanimous, and acting Mayor Kim Janey signed it two days later. The new measure allows up to 12 weeks of paid leave for men and women “for pregnancy loss, including all abortions for any reason,” according to the *Post*. The policy also allows leave time for parents of newborns and adoptive parents.

**Missouri**—In a widely circulated video, radical pro-abortion feminists can be seen trampling a pro-life memorial at Saint Louis University erected for the unborn victims of abortion. The memorial for the unborn victims of abortion had been erected by the Catholic school’s Students for Life. The video shows two young women, who are students at the Jesuit-run institution, kicking, trampling, and pulling up the small flags placed in the shape of a cross in memory of the unborn victims of abortion.

**Texas**—In November, the cities of Anson and Slaton became the 38th and 39th cities in Texas (the 42nd & 43rd nationwide) to formally declare status as “sanctuaries for the unborn,” forbidding the practice of abortion. The resolutions declare it “unlawful for any person to procure or perform an abortion of any type and at any stage of pregnancy” or to “knowingly aid or abet an abortion.” “Mifepristone, misoprostol, and any drug or medication that is used to terminate the life of an unborn child,” is also banned but does not apply to non-abortive contraception.

**Texas**—The Supreme Court has ruled that abortion providers in Texas can challenge a state law banning most abortions after six weeks, allowing them to sue at least some state officials in federal court despite the procedural hurdles imposed by the law’s unusual structure. But the Supreme Court refused to block the law in the meantime, saying that lower courts should consider the matter. A decision is expected sometime in June. If *Roe v. Wade* is reversed, the decisions on abortion return to each individual state to decide.

**Wisconsin**—The Oshkosh Area School District (OASD) which serves around 10,000 students has decided to forego informing parents of their child’s decision to identify as the opposite sex while in school, violating constitutionally protected parental rights in the process. Prior to the notice, employees were bound by an administrative guideline to seek parental consent “to use a student’s preferred name or gender pronouns if they differed from the student’s biological sex assigned at birth,” meaning teachers were obliged to make parents aware of any significant change in how their child perceives their nature. The fact that radical ideologies like this are gaining a foothold in the heartland of America is alarming and should serve as a wake-up call to parents around the nation.

**Wisconsin**—Democratic Governor of Wisconsin Tony Evers vetoed five pro-life bills in December, sharing photos of himself doing so on Twitter. He was praised by Planned Parenthood Advocates of Wisconsin, which tweeted, “Thank you [Governor Evers] for vetoing these bills and protecting access to abortion & birth control!”

**Nationwide**—The Biden Department of Labor announced in November that it is moving to roll back a Trump-era regulation

that broadened the definition of federal contractors who could claim religious exemptions to federal hiring regulations that interfered with their ability to hire personnel aligned with their religious beliefs. Under the Trump Administration, faith-based organizations that contracted with the government had the right to hire and fire employees according to their belief systems. Biden is seeking to take that right away. In addition, the Department of Health and Human Services announced they have revoked from federally funded foster care agencies religious protections put in place by the Trump administration in 2017. Most notably, they removed the blanket protection that foster care agencies can refuse the placement of children to same-sex couples as it would be a grievous violation of their religious beliefs. This radical pro-death administration did not stop there. Also in November, the State Department announced a gift of \$5 million in taxpayer funds to the United Nations Population Fund supplies program which aids women abroad in accessing contraceptives, abortion-inducing drugs, and abortion-performing “manual vacuum aspirator” devices.

### **Did You Know...**

➤ **Did you know that in a 2020 Ted Talk, Bill Gates famously argued that world population is approaching an unsustainable level of 9 billion, a looming catastrophe that needed to be addressed by finding ways to significantly reduce population growth?** The solution he proposed included a three-part plan, which he described as “doing a really great job on Vaccines, Health Care and Reproductive Health Services,” which could “lower [world population] by perhaps 10 to 15 percent.”

➤ **Did you know that the U.S. Navy christened the USNS Harvey Milk, named after the murdered San Francisco supervisor who made history in the 1970s as the California’s first openly homosexual elected official?** Despite Milk’s reputation for sexual predation, he has been lionized by the media, by Hollywood, and multiple times by former Democrat President Barack Obama. Omitted from most accounts of Milk’s life are his alleged sexual relationships with underage boys.

➤ **Did you know that in a new study, conducted by Arizona Christian University in connection with Foundations of Freedom, has found that 39 percent of Americans aged 18-24 refer to themselves as LGBTQ?** The wide-ranging study included people aged 18-37 years of age and was done in an effort to provide fresh insight on the generation. It appears that the propaganda of the left has worked well.

➤ **Did you know that radical pro-abortion protestors grandstanded in front of the Supreme Court building during oral arguments, apparently swallowing abortion pills in protest of the potential overturning of *Roe v. Wade* that may result from the Court’s ruling on *Dobbs v. Jackson Women’s Health*?** Sadly, many cheered the women on.

➤ **Did you know that a 49-year-old man from Texas died after receiving his second dose of the Moderna vaccine after he was forced to do so by the hospital that refused to complete his lung transplant until he was “fully vaccinated”?** Mr. Bolin, who did not want to take the Covid vaccine, developed

a pulmonary embolism and atrial fibrillation—a heart condition characterized by an irregular heartbeat, shortness of breath, chest pain and extreme fatigue. His health rapidly deteriorated and he passed away August 20, before receiving new lungs.

➤ **Did you know that some Canadian funeral homes have begun offering rooms where the consenting sick and the elderly can be killed prior to their wake and burial?** These new killing facilities are now able to offer an all-in-one package—death, wake, burial—thanks to the country’s Medical Assistance in Dying (MAID) protocol that has been legal since 2016 and expanded in 2021 to include people suffering with mental illness.

➤ **Did you know that a baby whose mother received two COVID vaccine shots during her last trimester of pregnancy was born bleeding from his mouth and nose, and died the day after his birth, according to a recent report to the U.S. government’s Vaccine Adverse Event Reporting System?** The infant death is one of 52 reported deaths among 30,550 adverse events recorded by VAERS for children under 17 years old as of December 3.

➤ **Did you know that Dr. Mehmet Oz, the Republican frontrunner in Pennsylvania’s closely watched U.S. Senate race, strongly defended abortion, slammed the pro-life movement, and mocked unborn babies’ hearts in an unearthed interview from 2019?** Dr. Oz is a celebrity wolf in sheep’s clothes. He is pro-abortion, pro-gender re-assignment, and pro-vaccine mandate. Be not fooled.

➤ **Did you know that David Fergusson is a pro-abortion researcher whose 2006 study found a higher rate of depression and other mental health problems among post-abortive women?** The study revealed that 42% of women who had undergone abortions within the previous four years suffered from depression at more than double the rate of women who hadn’t had abortions and higher than the rate of those who had given birth. The study also found higher rates of substance abuse, anxiety, and suicidal behavior in women who had undergone abortions. According to Fergusson, many of the medical journals he approached refused to publish the study.

### Catholic Watch...

Pope Francis has canceled public veneration of a statue of the Immaculate Conception for the second year in a row.

The Holy See press office announced on November 27 that in order to avoid the risk of spreading COVID-19 through a crowd, Pope Francis would perform a private devotion to Our Lady instead of participating in the decades-long ceremonial tradition in which the statue of the Blessed Virgin Mary, the Immaculate Conception, is adorned with a bouquet of flowers during a public gathering on the Spanish Steps.

Multiple parishes in the Archdiocese of St. John’s in Newfoundland, Canada, have announced that they will be barring those without a COVID vaccine passport from attending certain Masses, going beyond what the state requires them to do.

As of this week, various churches in the Archdiocese of St. John’s, Newfoundland have announced that per archdiocesan instruction, proof of vaccination will be required to attend

weekend Mass. In some parishes, those without a vaccine passport will be forced to stay at home and watch Mass via livestream, whereas other parishes are offering separate Masses for those who wish to fulfill their Sunday obligation without having to show proof they have received one of the abortion-tainted injections.

### Notable Quotables...

*“Our King tells us in His written word that our bodies ... are temples of the Holy Spirit. First Corinthians, 6:19: ‘Do you not know that your body is a temple of the Holy Spirit within you, which you have from God? You are not your own, you were bought with a price, so glorify God in your body.’ Do you believe that? Do you believe that your body is a temple of the Holy Spirit? Do you take it seriously? Among all the other things that that implies—if you do, if you do take it seriously—is this: that no earthly king or president or public health official or billionaire technocrat gets to dictate what we must put into our bodies—into these temples of the Holy Spirit.”*

—Fr. Edward Meeks,  
Towson MD

### Must See...

Recently, Robert F. Kennedy Jr., Children’s Health Defense Fund, released his new book entitled, *The Real Anthony Fauci*. In that book, Kennedy reveals a thousand reasons why America should stop listening to Fauci and another thousand reasons that he should be tried for crimes against humanity. In this book, Kennedy draws attention to the HIV experiments conducted on helpless children by the National Institutes of Health (NIH) under Fauci’s direction.

Vera Sharav was a child survivor of the holocaust who had witnessed first-hand how a corrupt system can systematically obliterate moral norms and human empathy in the name of public health. She has worked for decades to put a stop to unethical and abusive medical practices, including those subsidized and facilitated by government agencies and Big Pharma.

Her battle to break through conspiratorial silence and get the attention of the media and regulatory authorities has been an uphill battle, spanning decades.

But in 2004 there was a glimmer of hope. The BBC reached out to Sharav as part of an investigation for a documentary film, “Guinea Pig Kids.”

Based on the findings of investigative journalist Liam Scheff, the gut-wrenching documentary exposed Fauci’s torturous clandestine medical experiments on HIV-infected children in the care of Incarnation Children’s Center (ICC).

The ICC, which marketed itself as “New York City’s only skilled nursing facility providing specialized care for children and adolescents living with HIV/AIDS,” was the scene of these crimes against humanity.

In 1992, the National Institute of Allergy and Infectious Diseases (NIAID) provided funding to reintroduce the ICC as “an outpatient clinic for HIV-positive children” and the clinic

became part of Columbia University's Pediatric AIDS Clinical Trials Unit.

New York's child welfare department, the Administration for Children's Services, was empowered to offer up the vulnerable and underprivileged children under its care as lab rats to test toxic AIDS drugs like AZT, Nevirapine and various protease inhibitors, as well as experimental AIDS vaccines.

Most of these drugs, approved for adults with AIDS, carried Black Box warnings and caused potentially lethal side effects, including bone marrow death, organ failure, deformities and brain damage.

Most of the children were Black, Hispanic and poor, often born to drug-addicted mothers.

NIAID, capitalizing on the prevailing AIDS orthodoxy, justified the unethical experiments performed on these kids as the only chance they had to survive. Instead of adhering to requirements put in place to protect foster children, New York created an institutional review board, an ethics committee comprised of representatives from the same hospitals who were conducting the research to grant approvals.

In other words, approval was put in the hands of the stakeholders.

Watch this summary expose:

## Reflections...

### Saving the Children

We stand on the brink of exterminating humankind. I never thought I would write those words, but all caution and rational thought have evaporated from the minds of many.

Since the beginning of this pandemic, we have always told the truth about the statistics on Covid—that the deaths were grossly exaggerated and made to appear as if the risk of death was equal among all age categories. This was a false narrative which proves itself upon review of the data:

#### COVID SURVIVAL RATE

0-19:	99.99%
20-49:	99.98%
50-69:	99.50%
70+:	94.60%

Source: CDC (Estimated Infection Fatality Rates for COVID-19)

Despite this, all sorts of restrictive and damaging measures were imposed and continue to this day. Scores of injuries and deaths as a result of the vaccines are ignored with impunity and the warnings of high-level scientists who understand the technologies employed have been silenced.

The last line in the sand is the shameless attempt to vaccinate children, who can only suffer harm from an experimental gene therapy therapeutic.

Therefore, I am re-printing below the article by Dr. Paul Elias Alexander that speaks plainly to the risks from the reckless path health officials have chosen to take.

Paul Elias Alexander, MD

*LifeSite News* 11/22/21

The most updated data by the American Academy of Pediatrics showed that “Children were 0.00%-0.19% of all COVID-19 deaths, and 10 [U.S.] states reported zero child deaths. In states reporting, 0.00%-0.03% of all child Covid-19 cases resulted in death.”

The infection mortality rate (IFR) for COVID is roughly similar (or likely lower once all infection data are collected) to seasonal influenza. Stanford's John P.A. Ioannidis identified 36 studies (43 estimates) along with an additional seven preliminary national estimates (50 pieces of data) and concluded that among people younger than 70 years old across the world, infection fatality rates ranged from 0.00% to 0.57% with a median of 0.05% across the different global locations (with a corrected median of 0.04%). Survival for those under 70 years is 99.5% (Ioannidis update). Moreover, with a focus on children, “The estimated IFR is close to zero for children and young adults.” The global data are unequivocal that “deaths from Covid are incredibly rare” in children.

A high-quality robust study in the French Alps examined the spread of the coronavirus via a cluster of COVID-19. They followed one infected child who visited three different schools and interacted with other children, teachers, and various adults. They reported no instance of secondary transmission despite close interactions. These data have been available to the CDC and other health experts for over a year.

Ludvigsson published a seminal paper in the *New England Journal of Medicine* on COVID-19 among children 1 to 16 years of age and their teachers in Sweden. From the nearly 2 million children who were followed in school, with no mask mandates, there were zero deaths from COVID and a few instances of transmission and minimal hospitalization.

A study published in *Nature* found no instances of asymptomatic spread from positive asymptomatic cases among all 1,174 close contacts of the cases, based on a base sample of 10 million persons. The World Health Organization (WHO) also made this claim that asymptomatic spread/transmission is rare. This issue of “asymptomatic spread” is the key issue being used to force vaccination of children. The science, however, remains contrary to this proposed policy mandate.

The recent push by the CDC, Dr. Anthony Fauci, and other television medical “experts” who suggest that we can only get to herd immunity by vaccinating our children is absurd and patently false. They are denying scientific reality and spreading false information to the nation. The current data suggest that we are much nearer to herd immunity than they wish it to be. They continue to inaccurately discount cross protection immunity from prior coronaviruses and common colds. They have disregarded the fact that a large swath of the population was not captured in the case load, via laboratory confirmed cases.

The estimates range that for every ONE confirmed case, there might be six or even eight unidentified individuals who have had COVID. The many people who have recovered from COVID are being disregarded in Dr. Fauci's inaccurate state-

ments on herd immunity (such as his absurd statement that 90% must be vaccinated).

Children can become infected, as they do for usual pathogens they encounter in their daily lives, “naturally” and “harmlessly” as part of day-to-day living. We already know that there is no emergency in children regarding COVID-19.

Their innate immune systems are so very potent that they can vanquish this pathogen with ease in most instances. So why would Pfizer and Moderna Inc. engage in trialing this vaccine on children with a death rate in this group of 0.003%? They must show us why it is not dangerous to put this vaccine in children, and they have not.

We argue vehemently that if children are needed from a “numbers” point of view for driving population level “herd” immunity, then they must be allowed to get infected naturally and harmlessly as part of day-to-day living (not deliberately, but naturally and harmlessly and ensuring that we properly and strongly first protect the elderly and vulnerable among us).

We do it by opening schools and allowing them to live reasonably normal lives with sensible precautions like enhanced sanitation and hygiene.

Allow child-to-child daily interaction. Not only will that drive the adaptive immunity, but it will give the children a more robust defense against any mutant variants of the virus itself. This will also allow our children’s immune systems to be taxed and tuned up daily, as opposed to the weakening we are subjecting them to with the year-long lockdowns and school closures.

We can do this while at the same time strongly protecting the elderly, those with comorbid conditions, and obese individuals. We must use stringent protections of our nursing homes and other similar congregated settings (including the staff, who remain often the source of the infection). It is better science to use a more “focused” protection and targeting that is based on age and known risk factors, especially regarding children.

History teaches us to pause and reflect upon our previous miscues and unforced blunders that had significant consequences. It behooves us to remember the increased incidence of narcolepsy in children in Scandinavian countries following the H1N1 influenza AS03-adjuvanted vaccine used for the 2009 pandemic (Pandemrix influenza vaccination program).

The harms caused by the dengue vaccine in children in the Philippines also come to mind.

Sanofi Pasteur halted the vaccines in 2017 due to the very dangerous risk of plasma leakage akin to Ebola. “It’s a complication called plasma leakage syndrome...he [Halstead] was so worried, he started writing editorials to scientific journals, even warned the Filipino government about the problem...I just say, no, you can’t give a vaccine to somebody—some perfectly normal, healthy person—and now put them at risk for the rest of their lives for plasma leakage syndrome. You can’t do that.”

The tainted polio vaccine that sickened and fatally paralyzed children in 1955 in the United States is also worthy of review in this context. The harm that can accrue from a rapid deployment of mass vaccination to the children has not proven

to be safe in all the cases. Perhaps this comment is worth noting: “In 1977, for example, a triple vaccination (against diphtheria, pertussis and tetanus) from a defective batch left several children blind, deaf and disabled forever.”

There are potentially real harms to these COVID vaccines. There is the real concern of disease enhancement whereby “in the past for a few viral vaccines where those immunized suffered increased severity or death when they later encountered the virus [in the wild] or were found to have an increased frequency of infection.” This is a concern for the COVID vaccines, in adults and certainly children given the past catastrophic experience with the dengue vaccine.

More specifically, harms and adverse events (e.g. blood clots) are being reported in the CDC’s Vaccine Adverse Events Reporting System (VAERS) as well as globally. We need urgent study of the temporal relationship of reported adverse events to administration of the vaccines. Currently, there are near 900,000 adverse reactions reported to VAERS, near 20,000 deaths (all other vaccines 1990 to present 9,000 deaths), 20,000 life-threatening events, 90,000 hospitalizations, 28,000 permanent disabilities, near 100,000 ER visits, and over 600 birth defects (VAERS summary for COVID-19 vaccines through 10/29/2021).

It is still too early to tell how this will play out or how much worse this will become. We remain cautiously optimistic yet cognizant that the trials have not run for the optimal duration of time to assess safety.

I will close with this: we will likely kill thousands of our children with these COVID vaccines. You cannot take a 12- to 15-year vaccine development study process and boil it down to 3 months and say it is safe. This is dangerous, reckless, and reprehensible. President Donald Trump was greatly misled and deceived with the entire pandemic response and this vaccine. He must now come forward forcefully against these vaccines in children. He must clearly denounce these vaccines in any manner in children, calling into question these reported deaths and severe adverse events.

We need a hard stop today, period.

All entities involved in the vaccine—vaccine developers and agencies and all players—have liability protection. Remove their liability protection from the table if you want to vaccinate our children. Man up!

If you, Fauci, stand by these vaccines, you should have no problem removing the protections you have from liability.

And that way, if just one child is killed with these vaccines, we can hold you accountable. Consider children’s natural protections (e.g. limited ACE 2 receptors in nasal and oral passages and a primed pre-activated innate immune system sensitized to SARS-CoV-2, with existing B-cells and T-cells) enough to position them as already “vaccinated” and as such, leave them the hell alone!

## Upcoming Events...

Annual March for Life, 2022

The theme for the upcoming March for Life will be “Equality Begins in the Womb.”

“The pro-life movement recognizes the immense responsibility this nation bears to restore equal rights to its most defenseless citizens in the womb,” according to March for Life president Jeanne Mancini.

The 49th annual March for Life will be held on Friday, January 21, 2022, in Washington, D.C. Once again, we will be attending the world’s largest annual human rights demonstration.

### Details are as follows:

- |                     |   |
|---------------------|---|
| <b>7:00–7:45 am</b> | Mass for Life: St. Leo’s Church<br>2427 Marietta Avenue   |
| <b>7:45–8:15 am</b> | Light breakfast provided by the Love for Life Team at St. Leo’s   |
| <b>8:30 am</b>      | Buses depart for DC   |
| <b>11:30 am</b>     | Buses arrive at Air & Space Museum in DC  |
| <b>12:00 noon</b>   | Rally for Life at the Mall  |
| <b>1:30–3:00 pm</b> | March on Constitution Ave. to Supreme Court Building  |
| <b>3:00–5:00 pm</b> | Designated activities include: visits to Congressional and Senate Reps; visit to Pro-life exhibit and networking session. |
| <b>5:15 pm</b>      | Buses depart for PA   |
| <b>10:00 pm</b>     | Return to St. Leo’s Church  |

**The deadline for registration is January 18th.**

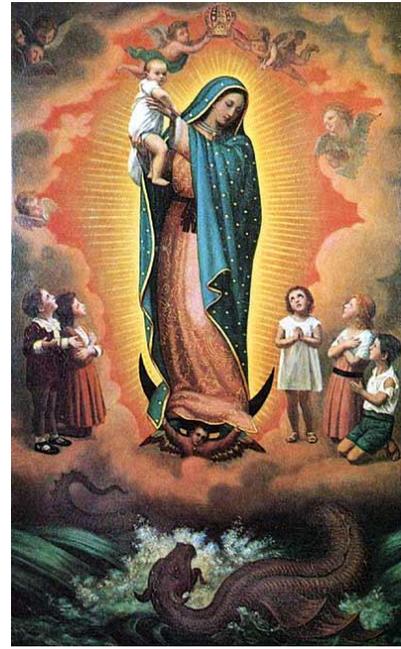

Checks are payable to Catholics Defending Life (CDL). Cost is \$10 per person; \$30 for families of three or more. Free seats are also available.

Please bring cash for dinner and warm winter attire, including boots.

Signs are welcome and can be stored in the bus.

**Please mark your calendars and join us!**

## **Pro-life Prayer for 2022:**

### *NOVENA PRAYER TO OUR LADY OF GUADALUPE*

*Oh Mary, Mother of Jesus and Mother of Life,  
We honor you as Our Lady of Guadalupe.*

*Thank you for pointing us to Jesus your Son,  
The only Savior and hope of the world.*

*Renew our hope in him,  
That we all may have the courage to say Yes to life,  
And to defend those children in danger of abortion.*

*Give us your compassion  
To reach out to those tempted to abort,  
And to those suffering from a past abortion.*

*Lead us to the day when abortion  
Will be a sad, past chapter in our history.*

*Keep us close to Jesus, the Life of the World,  
Who is Lord forever and ever. Amen.*
