High School 5K Loop:

An aerial photograph of a golf course layout. The course is irregularly shaped, surrounded by green agricultural fields and dense trees. Several water features are visible, including ponds and streams. Blue arrows are overlaid on the image, indicating the direction of water flow. The flow starts from the top left, moves right, then down, and follows a path that winds through the course, eventually leading to a large pond at the bottom right. The arrows show a complex network of flow paths, including a large loop on the right side of the course.
