Dear Parents:

The Louisiana Department of Agriculture and Forestry informs me that the school must maintain a registry of students who are hypersensitive to pesticides. If your child is hypersensitive to pesticides please inform me in writing. Your statement must include written verification by your child's physician. Please respond promptly.

Unless your child is hypersensitive he/she should experience no problems. Please be assured that we use licensed pest applicators, who perform their applications after the students leave the campus.

Thank you for your usual cooperation.

Sincerely,

Dawn Shipp, High School Principal
Danielle Ardoin, Elementary School Principal
