

Earth Day Activity

St. Paul on the Lake Junior High

- Select one of the options below (but you are welcome to do all of them)
 - Complete individually or ask family members to join
- Share activity with a photo and required information with your homeroom teacher
 - HAVE FUN AND ENJOY THE FRESH AIR

Find a quiet place in nature. Bring a journal and record everything you see. Record as many as 10 different insects, mammals, trees, and flowers. Share your list and photo.

Create a zip line for a small action figure to travel down from at least your shoulder height. Calculate the speed (distance divided by time) of the zip line. Share a video or picture.

Create a hoop glider using a straw and paper. How far can you make it go? <https://science4fun.info/how-to-make-a-hoop-glider/>

Record at least 10 trials. Share your data and a photo.

Play some basketball (or trash can ball)! Measure how many baskets you make out of 10. Calculate your percentage of accuracy. Make it a competition. Share your data and a photo.
